

FYSICA 2025 – Leiden 11 April 2025

Focus session 2 of the NNV section for Energy and climate: defossilization of industrial plants

In two interactive sessions of the NNV's climate and energy section, representatives of the Energy Directorate of the Ministry of Climate and Green Growth (formerly EZK) and an energy (network) company introduce two different challenges/problems they face to the public, which have to be solved. Expert physicists comment the cases and give their view and the public is also encouraged to participate. In this session: Defossilization of industrial plants.
