

Delft University of Technology
Friday, 26 May 2023

During lunch we offer a labtour in VLLAIR: The Van Leeuwenhoek Laboratory for Advanced Imaging Research.

Registration for the tour at the registration desk of FYSICA 2023 (limited number of tickets available)

Labtour: VLLAIR

The Van Leeuwenhoek Laboratory for Advanced Imaging Research (VLLAIR) is a unique facility for development and application of innovative microscopes and other imaging technology. It is a collaboration between the departments Imaging Physics, Quantum Nanoscience, and industrial parties. All labs are fully transparent to increase and stimulate cooperation between scientists and public-private parties. Most of the instruments in the lab (electron microscopes, super-resolution fluorescence microscopes, high resolution ultrasound imagers) are prototypes with unique functionalities.
