

**University of Twente, Enschede
Friday, 22 April 2022**

Focus session ‘Diversity in the Dutch science community’

Program:

- Vinod Subramaniam (chair of university board UT)
- Petra Rudolf (professor of experimental and solid state physics, RUG)
- Tamalika Banerjee (professor ‘Spintronics of functional materials, RUG)
- Linda Pasqual-van der Landen (communication advisor UT) and Sterre Nomazwe Mkatini (diversity officer UTwente)

Moderator: Diederik Jekel (chair NNV, science journalist and television presenter)

What does UT's President of the Executive Board Vinod Subramaniam have in common with RUG-professor Petra Rudolf, who works on 2D materials, nanotubes and molecular machines?

Let us hear your ideas about diversity, inclusion and equity! It would be great if this session helps to get many more people involved in recognising the challenges and creating opportunities. In this way, NNV members can easily participate in embracing diversity, increasing equity and promoting inclusiveness.

What to expect from this focus session:

First, panel members will give a short presentation, after which Diederik Jekel will moderate a discussion in which members of the audience are invited to get involved in the thinking about diversity in the Dutch Physics community. All attendees are encouraged to speak out their thoughts, talk about their experiences and about their ideas on how to contribute to inclusivity.

Invitation

We would like to meet young professionals, students, postdocs and other physicists who would like to contribute to the development of an NNV strategy. Are you unable to attend during the panel discussion at FYSICA 2022? Please contact us via bureau@nnv.nl.
